Please accept my resume and cover letter as application for the role of Data Scientist at Pinterest. I believe my unique mix of skills and experience will make me an excellent addition to your organization. I am currently the Director of Data Science and Technology at Discovery Digital Networks, a role in which I am both a tech leader and a data scientist. In this role, I have spent time working with business stakeholders to develop novel ways to improve published products, and to better understand performance in the marketplace. I have also worked to build the foundations of a data science organization within Discovery Communications, both by creating technical infrastructure, and by defining how data science interacts with other business functions, like engineering and finance.

Thanks for your time. I look forward to hearing from you.
